^{*}Estimated exposure only includes population within the map area.

Population Exposure

population per 1 sq. km from Landscan **Structures** 5000

Overall, the population in this region resides in structures that are highly resistant to earthquake shaking, though some vulnerable structures exist. The predominant vulnerable building types are unreinforced brick masonry and reinforced masonry construction.

122.8°W 121.4°W Fortuna Redding

Historical Earthquakes

Date	Dist.	Mag.	Max	Shaking	
(UTC)	(km)		MMI(#)	Deaths	
1993-09-21	369	6.0	VI(47k)	1	
1980-01-24	192	5.8	VII(35k)	1	
1989-10-18	247	6.9	VIII(109k)	62	

Recent earthquakes in this area have caused secondary hazards such as landslides and liquefaction that might have contributed to losses.
